

FLOW TUBES

the true measure of performance

Custom Variable Area Flow Tubes

Porter Instrument Company's heritage is based on the Variable Area Flow Tube. Today, Porter is recognized as the leading supplier of custom configured tubes. Porter Flow Tubes are the industry standard for medical anesthesia equipment, while Porter Flowmeters with special tubes are being utilized in the majority of veterinary anesthesia equipment.

Porter Custom Flow Tubes are also utilized in applications as diverse as water treatment equipment and specialized devices for testing rail car air brakes. For applications that demand accuracy and flexibility, Porter Flow Tubes are the solution. We can configure tubes for special length and diameter requirements, provide multiple tapers to increase range and supply a variety of float and scale options. We invite your inquiry.
